STARTING POINT

Bois-du-Luc mining site
Rue Saint-Patrice 2b, 7110 La Louvière

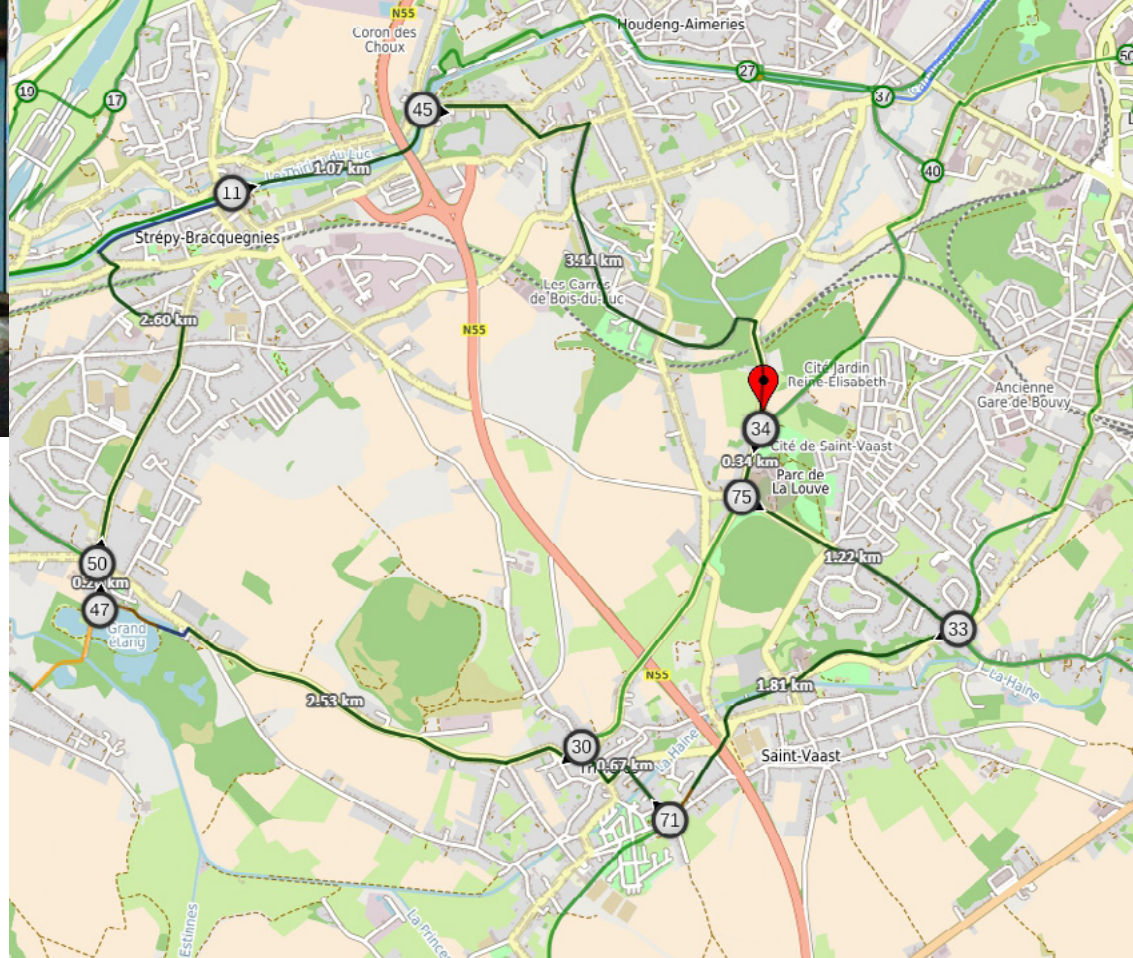

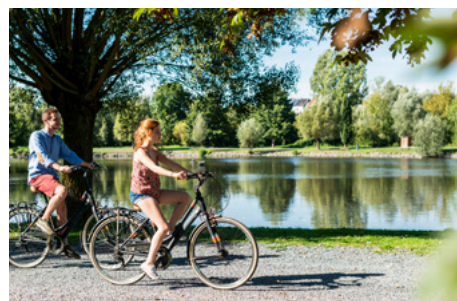

ROUTE DESCRIPTION

On this route, you can take a **step back in time** and explore the remarkable **mining heritage of the Centre Region**.

The mining village of Bois-du-Luc is unique in Europe for having preserved all of its industrial buildings, school, workers' houses and church. **Get on your bike** and thoroughly explore one of the **oldest and long-lasting coal mining sites in Belgium**. Then continue your ride by discovering the watery surroundings of the **Étangs de Strépy** and the **nature reserve**.

There's an incredible abundance of flora and fauna to be found within minutes of the town. Fancy a break in this lush landscape? The **Chalet des Étangs** can provide you with snacks and refreshments right by the water.

After a few more pedal strokes and you'll reach the banks of the historical **Canal du Centre**. Continue your journey as far as hydraulic lift no. 3, a **UNESCO World Heritage site**. On the right bank, the **machine hall** building looks like a castle with its neo-Gothic style (entry possible).
